Keep an eye on business calls in many ways...

Keep complete accountability of all your calls including record of missed calls - on your PC and in 'Call Printout'.

Four Separate Levels Full Caller ID PBX

1 CLI at all Extensions

- a) Put any Caller ID Phone on Extn. and see on display:
 - External CLI No.
 - Internal Extn. No. (Intercom)
- b) Even if the call is transferred from non CLI phone, CLI is transferable on Extensions.
- c) Incoming Call(s) are automatically stored in buffer.

2 Caller ID at PC

Display of incoming calls on PC in addition to missed calls and call billing details through serial port.

3 CLI at Operator Console

- a) CLI display of incoming calls at LCD
- b) Continuous display of CLI number during full conversation or the latest call.

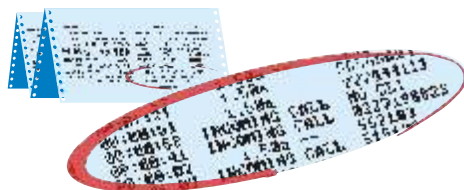

4 CLI in Call Printout

Get all incoming Nos. in printout along-with:

- a) Calling Phone / Mobile No. / DOSA call
- b) Indication of Particular CO Line
- c) Call time
- d) Talk time duration
- e) Unanswered / Missed Calls
- f) Printout Options of Incoming Calls:
 - (i) Individual Extn. wise
 - (ii) Individual Trunk wise

The performance of the CLI feature depends on quality of CLI signals received from City Exchange (Conditions Apply).

Call Charges display at CLIP Phone

- 1. Last call charges
- 2. The allotted budget and the amount consumed from the budget
- 3. Can also view call charges/budget etc. for any other Extn(s).

Parallel Companion Extension (PCE)

Double your extn. capacity of the same system on every extension.

Example: In 4+8 you can connect 16 phones as PCE On every extension

95 / Mobile Calls Locking

Besides full control over STD/ISD now can also control misuse of 95 code in 50 to 500 KM radius (presently) and even restrict the Mobile calls which are 3 times costlier.

Auto Redial - upto 99 Times with 3 Time Gaps

This feature provides automatic redialing of the last P&T No. dialed including STD/ISD codes upto 99 times (programmable).

Computer Connectivity

Through serial port of AX, the calls stored in the buffer can be viewed on PC by using the Hyperterminal utility of Windows. So, no special billing software package is required to interface PC and the AX.

Auto Call Disconnecter

This feature allows to fix the time of LOCAL/STD/ISD calls beyond which it will be automatically disconnected but with a pre-warning tone with 1 to 8 minute programmable.

Denied Table

This feature allows to make LOCAL/STD & ISD calls only to those permitted areas which are allowed.

Voice DISA & Auto Attendant - Two Ports (Optional)

With this Auto Attendant Service, your personalised recorded message greets the caller (upto 20 secs.) and directory services guides him to the appropriate extension (upto 40 secs.).

Restricted DISA

The extension programmed for this facility can not be called through DISA to keep you undisturbed by unauthorised callers.

Park-n-page / Voice Paging Port

Can make instant announcement to draw attention of any person(s) in premises. This extra Paging Port can be connected with multiple speakers through an amplifier.

Call Budgeting

Can budget any extension in Rupees or in International currency to check & control telephone call expenses with following options:

- 1. Fix a daily / monthly budget for each extension.
- 2. Print a report for call billing for the day / month.
- 3. Programmable option to continue / discontinue the last call.
- 4. High capacity of 4760 memories.

Executive Extension Ring

The special ringing pattern facility can be provided to the Senior Executive(s) for special attention when they make internal calls.

Multiple Trunk Grouping

The P&T lines can be divided in 8 groups (max.) and the specific extension(s) can only be allowed to access one of these groups as per requirement to control misuse. The incoming calls landing remain unaffected.

Operator Console (Optional)

The rugged Operator Console, which is optional, has the following powerful features:

Five Main Functions by Single Key

Single key operation of five main functions like: HOLD, TRANSFER, INTERCEPT, RELEASE and ANSWER phenomenally increases Operator's working efficiency.

Large size Backlit LCD Display

The 32 characters of large size Backlit LCD Display provides elaborate information like:

- 1. The Calling Extn. number
- 2. The Waiting Extn. number
- 3. The Display of External No. (with STD/ISD Code) Dialed.
- 4. Date & Time Display on Backlit LCD.

Who is calling ?	What's the time & date ?	Which no. dialed ?	Who is waiting in queue?
11.40.34 03 08 EXTN. 24 CALLING	11.42.30 03 08 RECORD	11.38.04 03 08 0228384884	EXTN. 24 IDLE RECORD

Bi-colour LED Display

The specially designed LED can change its colour automatically i.e. it will be Red on internal communication and Green on External (P&T) communication.

This special Display provides instant visual indication to distinguish whether the user is busy on internal or external calls enabling Operator to carry onward operation.

Automatic Ringer Volume Control (if Operator Busy)

The incoming call's ring volume automatically become high or low if operator is found free or busy, which facilitates soothing operations.

Distinguished Ringing Tones for Internal and External Calls

The different ringing tones discriminate for internal and external calls, enabling the operator to decide priority among them.

Priority Selection Among the Waiting Extns.

The operator can attend any of the calling Extns. first out of many waiting in queue, keeping in view the importance.

Night Transfer by Operator

In absence of operator all calls can be transferred to any desired Extn. so as to facilitate uninterrupted working.

Larger Distance Between Console & PABX Possible

The special designing has facilitated to keep Console upto 75 ft. away from EPABX.

User Friendly

The entire working of ACCORD's compact Operator Console is highly user friendly keeping in view easy operations. low fatigue & powerful features.
