KX-TG2358BX 2.4 GHz Digital Cordless Phone

Outstanding Features with Built-In Quality

All Digital Answering System

A microchip handles all messages. You can control the system, not only by pressing the base unit's buttons but from the handset as well.

50-Station Phone Book

The handset can store up to 50 names and phone numbers in its phone book. You can make a call by selecting a name or number from the phone book.

50-Station Caller ID Memory*

The unit will retain in its memory up to the most recent 50 numbers from the Caller ID memory, providing direct call back capability.

Up to 3-Way Conference Calling (Handset, Base Unit and Line)

Even during a conversation with an incoming caller, you can call up the base unit handset, portable handset, or speakerphone on the base unit to make 3-party conversation at the same time.

Talking Caller ID*

Regular Caller ID displays the caller's name. (This service must be activated through your phone company.) Talking Caller ID compares the caller's phone number with those in your phone book.

*Requires subscription to Caller ID service. Please check with local Telephone Company for details and availability.
